 Portfolio

EDUCATION

Savitribai Phule Pune University, Pune
Bachelor of Computer Applications (BCA)

2020 – 2023
CGPA: 8.79/10.00 (A+ Grade)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL, HTML, CSS,

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, Bootstrap

Backend & Database: Node.js, Express.js, REST APIs, JWT Auth, MongoDB, MySQL

Deployment & Tools: Vite, Git, GitHub, Postman, Vercel

Core Concepts: Object-Oriented Programming, Database Management Systems, Data Structures & Algorithms

EXPERIENCE

SKYi Technology, Pune

May 2024 – May 2025

Full Stack Developer Intern - Remote

- Developed and maintained 15+ e-commerce features using React.js, Next.js, Node.js, Express.js, and MongoDB, including product management, inventory tracking, and order processing.
- Built an admin dashboard with role-based access control (Admin/User), enabling admin to manage products, user accounts, and orders through CRUD operations while providing visibility into sales and inventory metrics.
- Resolved 30+ bugs and participated in application testing, performance optimization, and Git-based version control, contributing to a more stable and maintainable codebase.
- Collaborated with a team of developers to build web applications, integrate payment gateways, implement security best practices, and deliver responsive user experiences across desktop and mobile devices.

PROJECTS

Cryptocurrency Price Tracker

Live | [Source Code](#)

Tech Stack: React.js, Chart.js, CoinGecko API, CryptoCompare API, Vite, CSS3

- Developed a real-time cryptocurrency dashboard using React.js, integrating CoinGecko API for live data on 1,000+ coins with auto-refresh every 60 seconds.
- Implemented advanced filtering and sorting by price, volume, and market cap, along with interactive historical charts (24h to 1y) using Chart.js.
- Integrated a categorized crypto news feed via CryptoCompare API, enhancing relevance and user engagement.
- Optimized performance using caching, code splitting, and virtualization, resulting in faster data rendering and smoother user experience.

QuickCart E-Commerce App

Live | [Source Code](#)

Tech Stack: React.js, Node.js, Tailwind CSS, FakeStoreAPI, React Router, Context API

- Created a responsive e-commerce platform for 20 products with real-time listings using FakeStoreAPI.
- Added filters (category, price, availability) and cart functionality to streamline shopping flow.
- Managed global state across 5+ components using Context API and React Hooks to maintain consistent UX.
- Used reusable components, React Router, and Tailwind CSS to ensure cross-device compatibility.

FilmFinder Movie App

Live | [Source Code](#)

Tech Stack: React.js, OMDB API, Bootstrap 5, CSS Modules, React Hooks

- Built a movie search app using OMDB API to display real-time data for 100,000+ movie titles.
- Added genre-based browsing and favorites management using React Hooks and persistent state handling.
- Improved performance by 30% using lazy loading, memoization, and list virtualization with accessibility support.

CERTIFICATIONS

- React – Udemy Certificate
- JavaScript Mastery – Udemy Certificate
- Node.js, Express.js, REST APIs & MongoDB Masterclass – Udemy Certificate
